Watch the video

Enhanced UV resistance,  
better than standard PU foam

Dense, consistent cell structure  
with high and lasting flexibility.  
The foam does not become brittle.

Vertical & horizontal  
application

# Parafoam INSULATION NBS

One-component PU gunfoam with very low diisocyanate content

Thermal and acoustic insulation of buildings, vehicles and vessels

Repair insulation works

Reduce the risk of thermal bridges

Prevent condensation on cold surfaces

The unique spray applicator ensures easy, consistent and quick spraying, even in hard-to-reach places and uneven or curved surfaces, such as pipes, barrels, tanks, attics, basements, garage doors, containers, lintels, doors, ceilings.
